

**Moshe Mash, Ph.D.**

moshikmash@gmail.com | +1-412-626-1676 | [moshemash.com](http://moshemash.com) | [linkedin.com/in/moshemash](https://www.linkedin.com/in/moshemash)

---

## **Research Interests**

Multi-Agent Systems; Game Theory and Mechanism Design; Social Choice and Fair Division; Human-AI Collaboration and Mixed Human-Agent Settings; Decision-Making by Artificial Agents and Humans; Modeling and Prediction of Human Behavior; Analysis of Data Science and Machine Learning Workflows; Natural Language Processing and Large Language Models; Computational Analysis of Specialized Text Corpora (Hebrew and rabbinic texts, legal and patent documents); Human-Centered AI.

---

## **Education**

**Ph.D., Software and Information Systems Engineering | Ben-Gurion University of the Negev | 2014–2018**

- **Dissertation:** Reaching Fair Agreements in Group Settings
- **Advisor:** Prof. Ya'akov (Kobi) Gal

**M.Sc., Computer Science (AI specialization) | Bar-Ilan University | 2011–2013**

- **Thesis:** Joint Exploration with Self-Interested Agents
- **Advisor:** Prof. David Sarne

**B.Sc., Software Engineering | Shenkar College of Engineering and Design | 2007–2011**

---

## **Awards & Recognition**

- **Best Paper Award** – ACM Conference on Economics and Computation (2016)
  - **Communications of the ACM Research Highlight** – Which Is the Fairest (Rent Division) of Them All? (2018)
  - **Excellence in Teaching Award** – Ben-Gurion University (2016, 2017)
  - **Ph.D. Scholarship for Academic Excellence** – Ben-Gurion University (2014)
-

## **Academic Positions**

### **Postdoctoral Researcher | Carnegie Mellon University, Robotics Institute | 2019–2022**

- Hosted by Prof. Reid Simmons and Dr. Stephanie Rosenthal.
- Conducted research on the behavior and cognitive processes of machine learning practitioners as they develop AI models.
- Designed frameworks to capture, model, and analyze workflows, with emphasis on decision-making, iteration cycles, and knowledge bottlenecks.
- Developed predictive methods to identify critical moments of difficulty (“stuckness”) in ML development, enabling targeted support and improved productivity.
- Collaborated with multidisciplinary teams to integrate human-centric AI approaches into machine learning tools and environments.
- Mentored students in AI and human-computer interaction research.
- Research funded by J.P. Morgan, which renewed the award for a second consecutive year based on the project's strong results.

### **Research Assistant | Weizmann Institute of Science | 2011–2012**

- Developed image-processing algorithms for 3D biomedical images.
- 

## **Industry Research Positions**

### **Principal AI Researcher & Founder | MashInnovateAI | 2024–present**

- Independent AI research & development consultancy: helps organizations identify where AI can solve their hardest problems, then designs and delivers the solution end to end - applied ML, NLP, LLM fine-tuning, RAG, and agentic and multi-agent systems - from proof of concept to production deployment.
- Clients include technology companies looking to integrate AI into their products and workflows, startups, and universities and academic research groups.

### **AI Researcher | DICTA – The Israel Center for Text Analysis | 2022–present**

- Lead the center's NLP and LLM research on large collections of Hebrew and rabbinic texts: set the research agenda, design the methods, and take systems from prototype to tools in active use by scholars.

- Authorship attribution: built models that predict the author of texts with historically disputed attribution from textual signals alone, reaching high accuracy and resolving long-debated questions of authorship.
- Citation detection and cross-referencing: designed systems that automatically detect, extract, and link citations of classical sources across a large corpus, connecting documents that quote or paraphrase one another.
- Document understanding with LLMs: fine-tuned LLMs and trained custom text embeddings with contrastive learning for domain-specific corpora, powering information extraction, semantic search, text similarity, clustering, and question answering over long, complex documents.
- Linguistic analysis: built deep-learning models for morphological, syntactic, and semantic analysis of long, complex documents at scale.
- Infrastructure and deployment: built the end-to-end training and inference pipeline, with tooling to analyze model outcomes and inspect the training process, and deployed the resulting document-understanding systems to production.

#### **AI Researcher | Diagnostic Robotics | 2019**

- Developed machine learning models for the healthcare domain, with applications in risk prediction (e.g., ER diagnoses, hospitalization forecasting).
- Collaborated with clinicians and researchers to refine AI-driven predictive healthcare decision-support systems.

#### **AI Researcher | Amdocs | 2018-2019**

- Led the development of a churn-prediction system for at-risk maintenance contract renewals, saving millions of dollars.
  - Designed, built, and deployed the system from scratch, including problem definition, algorithm design, evaluation, and deployment pipeline.
- 

#### **Teaching & Advising**

##### **Ben-Gurion University of the Negev – Software and Information Systems Engineering Dept.**

- Teaching Assistant, Databases – Fall-Spring 2016, 2017, 2018
- Teaching Assistant, Analysis and Design of Software Systems – Spring-Summer 2016, 2017, 2018

- Teaching Assistant, Intelligent Systems – Spring–Summer 2015
- Teaching Assistant, Decision Support Systems – Fall–Spring 2015
- Departmental Seminar Coordinator – 2015, 2016, 2017, 2018
- Final Projects Coordinator (4th Year) – 2015, 2016, 2017, 2018
- Final Projects Adviser (Undergraduate) – 2015, 2016

#### **Tel-Aviv Yafo Academic College – Information Systems Dept.**

- Lecturer, Databases – Spring–Summer 2015, Fall–Spring 2015
- Lecturer, Game Theory – Spring–Summer 2015
- Teaching Assistant, Databases – Spring–Summer 2014

#### **Bar-Ilan University**

- Teaching Assistant, Statistical Methods in Computer Science – Spring–Summer 2014
- Teaching Assistant, Object-Oriented Programming – Fall–Spring 2013, 2014
- Teaching Assistant, Machine Learning – Fall–Spring 2014
- Teaching Assistant, Introduction to Computing – Fall–Spring 2013

#### **Shenkar College of Engineering and Design**

- Teaching Assistant, Introduction to Programming Systems – Spring–Summer 2012
- Teaching Assistant, Introduction to Computer Science – Fall–Spring 2012
- Teaching Assistant, Introduction to Object-Oriented Programming – Fall–Spring 2012

#### **College of Management (Academic)**

- Teaching Assistant, Object-Oriented Programming – Spring–Summer 2012

#### **High School Teaching (Israel Ministry of Education)**

- Mathematics Teacher (2010–2013) – taught Bagrut levels 3–5 points, specializing in students with learning disabilities (via Nitzan Association).

#### **Professional Service**

- **Reviewer:** AAAI, IJCAI, AAMAS, KDD, CHI, EC, ECAI, Group Decision & Negotiation

- Developed voting algorithm for Best Paper selection (IAAI 2018)
  - Organized departmental seminars at Ben-Gurion University
- 
-
