

Moshe Mash, Ph.D.

moshikmash@gmail.com | +1-412-626-1676 | moshemash.com | linkedin.com/in/moshemash

Summary

- AI researcher specializing in natural language processing and document understanding - extracting structure and meaning from large, unstructured text collections. Over the past year at DICTA I have focused on understanding text at scale: information extraction, document classification, citation and cross-reference detection, semantic search, and question-answering over complex documents, using fine-tuned LLMs and retrieval-augmented generation taken through to production. Ph.D. in Software and Information Systems Engineering (Ben-Gurion University); postdoctoral fellow at Carnegie Mellon's Robotics Institute. Over a decade translating research into production - built predictive systems at Amdocs saving millions annually, deployed clinical ML at Diagnostic Robotics, and now founder of MashInnovateAI. Best Paper Award at ACM EC 2016 and a Communications of the ACM Research Highlight (2018), with publications in JACM, AIJ, CHI, IJCAI, and Science Translational Medicine.
 - **Core Skills:** Natural Language Processing (NLP) · Document & Text Understanding · Information Extraction · Document Classification · Semantic Search & Similarity · Question-Answering over Documents · LLM fine-tuning · Retrieval-Augmented Generation (RAG) · Applied AI · Agentic AI · End-to-end delivery (proof of concept → production) · Python · PyTorch · HuggingFace Transformers · Production ML · SQL · Distributed Training · Multi-Agent Systems · Game Theory & Mechanism Design
-

Research Interests

Text Understanding, Text Analysis, Natural Language Processing, Multi-Agent Systems, Human-Agent Environments, Decision-Making, Game Theory and Mechanism Design, Human-AI Interaction, Human-Centric AI, Artificial Intelligence, Machine Learning, Data Science Workflows.

Education

Ph.D., Software and Information Systems Engineering | Ben-Gurion University of the Negev | 2014-2018

- **Dissertation:** Reaching Fair Agreements in Group Settings
- **Advisor:** Prof. Ya'akov (Kobi) Gal

M.Sc., Computer Science (AI specialization) | Bar-Ilan University | 2011-2013

- **Thesis:** Joint Exploration with Self-Interested Agents
- **Advisor:** Prof. David Sarne

B.Sc., Software Engineering | Shenkar College of Engineering and Design | 2007-2011

Awards & Recognition

- **Best Paper Award** – ACM Conference on Economics and Computation (2016)
 - **Communications of the ACM Research Highlight** – Which Is the Fairest (Rent Division) of Them All? (2018)
 - **Excellence in Teaching Award** – Ben-Gurion University (2016, 2017)
 - **Ph.D. Scholarship for Academic Excellence** – Ben-Gurion University (2014)
-

Academic Positions

Postdoctoral Researcher | Carnegie Mellon University, Robotics Institute | 2019-2022

- Hosted by Prof. Reid Simmons and Dr. Stephanie Rosenthal.
- Conducted research on the behavior and cognitive processes of machine learning practitioners as they develop AI models.
- Designed frameworks to capture, model, and analyze workflows, with emphasis on decision-making, iteration cycles, and knowledge bottlenecks.
- Developed predictive methods to identify critical moments of difficulty (“stuckness”) in ML development, enabling targeted support and improved productivity.
- Collaborated with multidisciplinary teams to integrate human-centric AI approaches into machine learning tools and environments.
- Mentored students in AI and human-computer interaction research.
- Research funded by J.P. Morgan, which renewed the award for a second consecutive year based on the project's strong results.

Research Assistant | Weizmann Institute of Science | 2011–2012

- Developed image-processing algorithms for 3D biomedical images.
-

Industry Research Positions

Principal AI Researcher & Founder | MashInnovateAI | 2024–present

- Independent AI research & development consultancy delivering end-to-end custom AI systems - NLP, LLM fine-tuning, RAG, agentic and multi-agent LLM systems, and applied ML - from proof of concept to production deployment for research and industry partners.
- Clients include startups, established companies looking to integrate AI into their products and workflows, and universities and academic research groups.

AI Researcher | DICTA – The Israel Center for Text Analysis | 2022–present

- Lead text-understanding research over large, unstructured Hebrew and rabbinic document collections - turning raw text into structured, searchable, analyzable data.
- Built systems and deep-learning models for in-depth analysis of text - morphological, syntactic, and semantic understanding of long, complex documents at scale.
- Built NLP models for authorship attribution and document classification - predicting the author of texts with historically disputed attribution from textual signals alone.
- Reached high predictive accuracy and applied these models to resolve long-debated questions of authorship, demonstrating reliable classification of ambiguous documents at scale.
- Designed systems for automatic citation detection, extraction, and cross-referencing of sources across a large document corpus.
- Built LLM-based tools for information extraction, semantic search, text similarity, clustering, and question-answering over documents - training custom text embeddings with contrastive learning and fine-tuning LLMs for domain-specific corpora.
- Built end-to-end systems for model training and inference, with tooling to analyze model outcomes and inspect the training process itself.
- Took models from research through to production deployment, delivering document-understanding systems actively used for live analysis of large text collections.

AI Researcher | Diagnostic Robotics | 2019

- Developed machine learning models for the healthcare domain, with applications in risk prediction (e.g., ER diagnoses, hospitalization forecasting).
- Collaborated with clinicians and researchers to refine AI-driven predictive healthcare decision-support systems.
- Tech stack: Python, scikit-learn, and clinical/EHR data pipelines.

AI Researcher | Amdocs | 2018–2019

- Led the development of an innovative system predicting at-risk maintenance contract renewals, saving the company millions of dollars and still in operational use years later.
 - Designed, built, and deployed the system from scratch, including problem definition, algorithm design, evaluation, and deployment pipeline.
 - Tech stack: Python, scikit-learn, SQL, and a production deployment pipeline.
-

Teaching & Advising

Ben-Gurion University of the Negev – Software and Information Systems Engineering Dept.

- Teaching Assistant, Databases – Fall–Spring 2016, 2017, 2018
- Teaching Assistant, Analysis and Design of Software Systems – Spring–Summer 2016, 2017, 2018
- Teaching Assistant, Intelligent Systems – Spring–Summer 2015
- Teaching Assistant, Decision Support Systems – Fall–Spring 2015
- Departmental Seminar Coordinator – 2015, 2016, 2017, 2018
- Final Projects Coordinator (4th Year) – 2015, 2016, 2017, 2018
- Final Projects Adviser (Undergraduate) – 2015, 2016

Tel-Aviv Yafo Academic College – Information Systems Dept.

- Professor, Databases – Spring–Summer 2015, Fall–Spring 2015
- Lecturer, Game Theory – Spring–Summer 2015
- Teaching Assistant, Databases – Spring–Summer 2014

Bar-Ilan University

- Teaching Assistant, Statistical Methods in Computer Science – Spring–Summer 2014

- Teaching Assistant, Object-Oriented Programming – Fall–Spring 2013, 2014
- Teaching Assistant, Machine Learning – Fall–Spring 2014
- Teaching Assistant, Introduction to Computing – Fall–Spring 2013

Shenkar College of Engineering and Design

- Teaching Assistant, Introduction to Programming Systems – Spring–Summer 2012
- Teaching Assistant, Introduction to Computer Science – Fall–Spring 2012
- Teaching Assistant, Introduction to Object-Oriented Programming – Fall–Spring 2012

College of Management (Academic)

- Teaching Assistant, Object-Oriented Programming – Spring–Summer 2012

High School Teaching (Israel Ministry of Education)

- Mathematics Teacher (2010–2013) – taught Bagrut levels 3–5 points, specializing in students with learning disabilities (via Nitzan Association).
-

Professional Service

- **Reviewer:** AAAI, IJCAI, AAMAS, KDD, CHI, EC, ECAI, Group Decision & Negotiation
 - Developed voting algorithm for Best Paper selection (IAAI 2018)
 - Organized departmental seminars at Ben-Gurion University
-
